# TFS-COMPLIANCE

It's the complete digital fire safety management platform, tailored for your business needs by Joule Group Chartered fire engineers. It can help reduce risk to occupants and your business, meet regulations, and boost efficiency through innovation.

- Complete app-based inspections in a few taps
- Monitor your global estate from a cloud-based dashboard
- Boost safety and efficiency with data-driven insights

Proactively manage risk and turn digital inspection data into valuable commercial insight.

## KNOWLEDGE IS POWER

Compliance is complex. Technology is only as good as the intelligence behind it. True insight empowers you with more than 'a digital record'.

## ADDRESS MAJOR FIRE SAFETY RISKS

With **TFS-COMPLIANCE** you can simplify inspections, automate reporting, reveal insights and continuously improve safety. **TFS-COMPLIANCE** helps you greatly reduce risk around compliance, fire incidents, loss of life, property damage and financial loss.

## REGULATION TECHNOLOGY BUILDS REPUTATION

**TFS-COMPLIANCE** doesn't just help you manage inspections, improve safety and comply with fire safety regulations. It maintains a secure digital record of your compliance, protecting your reputation and supporting insurance claims.

Major [fire safety law breach] penalties can have unlimited fines and up to 2 years in prison

- GOV.UK

# Streamline fire safety compliance.

## SIMPLIFY COMPLIANCE TODAY AND TOMORROW

Influential reviews like the UK's Hackitt Report call for fire inspection data to be digitised, to improve safety and make building operators more accountable. With **TFS-COMPLIANCE** you have the tools to meet new needs and protect your reputation.

## TRACK EVERYTHING. AUTOMATE AUDITING.

Regulators want the full picture on who carried out your inspections, which assets were checked, what was found, and when. The secure **TFS-COMPLIANCE** app records all this for you, building a comprehensive data trail for easy auditing.

## BUILT BY FIRE SAFETY EXPERTS

It's more than software. Your solution is tailored to meet local compliance needs. You also receive training, customised tools and world class customer support. You have an expert partner in fire safety compliance.

The Fire and Emergency File and digital record are two key products that form part of the golden thread of information [on fire safety]  
- The Hackitt Report

## Tap the value of data.

### ADVANCE YOUR IoT STRATEGY

**TFS-COMPLIANCE** takes smarter buildings to the next level, creating valuable IoT-like data loops for passive assets like fire exits and extinguishers. App-based inspections gather data. Analytics turn data into insights. Insights help you continuously improve safety.

### AUTOMATE FOR EFFICIENCY.

Paper-based inspection processes are time consuming, error prone and difficult to audit. With the secure **TFS-COMPLIANCE** app, inspections are streamlined. Data collection, reporting and auditing are automated. It's digital innovation that delivers real value.

### FIRE SAFETY DATA INSIGHTS REVEALED THROUGH DIGITAL COMPLIANCE

With paper-based inspections, valuable insights stay hidden. **TFS-COMPLIANCE** inspections reveal them in a custom dashboard, where you can monitor and manage your whole estate. You have the insights you need to continuously improve fire safety.

The Internet of Things is already having a significant impact on the CRE (commercial real estate) industry, helping companies move beyond a focus on cost reduction

- Deloitte

# TFS-COMPLIANCE

is built by Joule Group, an independent firm of fire safety designers, engineers and consultants with a global presence.

## FEATURES

### SCHEDULING

Add your assessment schedule, set due dates for your assessments, and use reminders so that you are alerted well in advance of fast approaching due dates.

### REPORTING DASHBOARD

Use a real time cloud based dashboard to track your assessments and issues. View the status of your daily, weekly, monthly, quarterly and annual checks. Sort your reports by date and rank buildings in anyway you like. Create and download custom reports in PDF or CSV format.

### ISSUE MANAGEMENT

Full issue management allows you to track the status of your issues, see date and time stamps, and action issues at the push of a button.

### DOCUMENT STORE

Use the document store to keep all your reports and compliance documents together.

### STANDARD CATEGORIES

Select from a list of the standard regulatory categories to ensure you are meeting legislative requirements. Or you can create custom categories to track any assessment you need.

### MULTIPLE BUILDINGS

The Cloud based reporting gives real time visibility to the fire & life status of your entire building portfolio globally.

### PHOTOGRAPH ISSUES

Adopting a digital solution across the passive and active assets in your building will significantly advance your SMART Building Strategy.

### MULTIPLE USERS

Assign users to buildings, to levels, and to zones, to manage users access across your estate. Track your company's most reliable and active users to see who stands above the rest.

### SCAN ANYTIME

Scan assets at any time to complete assessments, update assessments, or record issues immediately.

### SIMPLE CONFIGURATION

Configure a network of buildings directly to the system with ease. Follow the simple set-up flow and begin using TFS instantaneously.

## BENEFITS

### STREAMLINE PROCESSES

Paperless app-based inspections provide long term traceable records without complicated paper trails.

### FIX SAFETY ISSUES FASTER

Receive actionable insights that highlight problems, prioritise maintenance tasks and help you manage fire safety inspections effectively.

### MAKE BUILDINGS EVEN SMARTER

Include fire safety in your smart building strategy, with IoT-like data capture from passive assets like fire extinguishers and emergency exits.

### GAIN GLOBAL VISIBILITY

One dashboard, securely accessible anywhere, gives you a complete view of fire safety across your global estate.

### MEET UNIQUE BUSINESS NEEDS

Your solution is configured for your unique business needs, from local reporting and audit requirements to the terminology used in your apps.

### MEET COMPLIANCE GOALS

Deploy a custom solution designed to fit your local regulatory needs, and automate reporting and auditing to simplify compliance.

### REDUCE FIRE SAFETY INCIDENTS

Better fire safety management reduces the risk of assets failures, helping to prevent dangerous and costly incidents.

### RE-ASSESS YOUR INSURANCE PREMIUMS

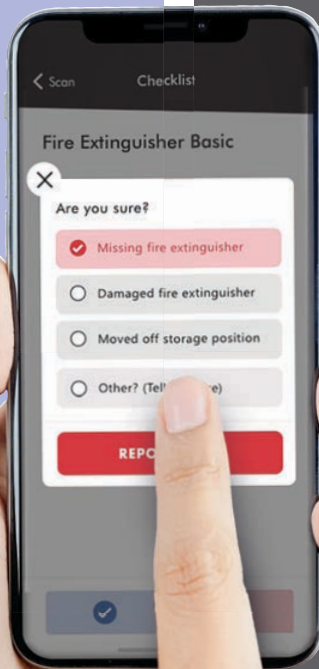

Insurance companies and their Risk Assessors use evidence based process and data to determine insurance premiums having a digital solution to track and monitor risk will enhance this discussion.

### REDUCTION IN THE RISK OF FINES FOR NON-COMPLIANCE

Having real time visibility to fire and life status across an estate is likely to reduce the possibility of fines and impacts from inspection failures.

### IMPROVED MAINTENANCE COST

Daily visibility to issues and required remedial work allows you to manage maintenance budgets more effectively which will reduce cost over time.
